

Yiwei ZHAO | 赵奕炜

Curriculum Vitae

Carnegie Mellon University

Office: Room 41D6, Collaborative Innovation Center, 4720 Forbes Ave, Pittsburgh, PA, 15213

Email: yiwei3@andrew.cmu.edu / yiweizhao@cmu.edu | Website: <https://zhaoyw007.github.io/>

Last modified in May 2026

RESEARCH INTERESTS

Cross-Stack Design for Emerging Hardware Systems. Broadly spanning Parallel and Distributed Computing.
Inter-discipline of: Algorithmic Theory + Computer System Design + Computer Architecture and Hardware.

EDUCATION

Carnegie Mellon University, Pittsburgh, Pennsylvania, 2021-present.

- Ph.D. candidate in Computer Engineering.
- Advisor: Prof. Phillip B. Gibbons.

Tsinghua University, Beijing, China, 2017-2021.

- B.E. in Electronic Engineering. Graduated with highest honor.
- Double major in Economics & Finance.

FELLOWSHIPS, HONORS & AWARDS

- Michel and Kathy Doreau Graduate Fellowship (2024 - 2025).
- Lee-Stanziale Ohana Fellowship (2023 - 2024).
- Qualcomm PhD Fellowship Finalist (2024).
- Best Paper Runner-up, VLDB (2023) [6].
- Carnegie Mellon Institute of Technology Dean's Fellow (2021 - 2022).
- Undergraduate with Highest Honor, Tsinghua University & Beijing (2021).
- China National Fellowship for Undergrads (2018 - 2020).

RESEARCH EXPERIENCE

Carnegie Mellon University (Graduate Research Assistant), Pittsburgh, PA. August 2021 – present.

- Thesis Title: Algorithm-System Co-Design of Processing-in-Memory Systems.
- **Foundation of Processing-in-Memory**: Multi-year effort to design provably guaranteed, practically efficient PIM and emerging-hardware systems. Developed index structures [3,6,7] with provably optimal utilization (throughput) and minimal data movement (power) and high real-world performance. Spanning applications across vector search in vector databases [2], end-to-end OLTP systems [4], system scheduling [1] and distributed graph processing [13].

Meta (Research Scientist Intern), Redmond, WA. May 2025 – August 2025; May 2023 – November 2023.

- **AdaVFM** [14] (May 2025 – August 2025): An adaptive on-device inference framework for language-aligned vision foundation models, combining task-aware model scaling, NAS-guided subnet selection, and cloud-assisted multimodal control. State-of-the-art accuracy-efficiency trade-offs for open-vocabulary vision tasks.
- **H4H** [5,11] (May 2023 – November 2023): A two-stage NAS framework that automatically co-optimizes hybrid CNN/ViT models for heterogeneous edge systems combining NPUs and PIM, leveraging architectural heterogeneity and further optimizes hardware and circuits accordingly. State of the art in small on-device vision models.

Tsinghua University (Undergraduate Researcher), Beijing, China, September 2017 – June 2021.

- Thesis: Error Tolerant Designs for ReRAM based Compute-In-Memory Accelerators.

TEACHING EXPERIENCES

- **18-751 Applied Stochastic Processes, with Applications to AI/ML**: Teaching Assistant, Fall 2024, CMU.
- **18-742 Computer Architecture and Systems**: Teaching Assistant, Spring 2024, CMU.

SERVICES

- **External Review Committee**: PACT'25.
- **Junior/Shadow Program Committee**: SPAA'26, SPAA'25.
- **Artifact Evaluation Committee**: ALLENEX'26.
- **Student Council for Departmental Faculty Hiring**: Chair, January 2024 – June 2025, CMU.
- **Student Council for Departmental Faculty Hiring**: Member, January 2023 – January 2024, CMU.

INVITED TALKS

(All conference paper presentations are excluded due to space limit; please refer to the *Publications* for the complete list.)

- **October 2025, UC Berkeley, Simons Institute for the Theory of Computing. In Algorithmic Foundations for Emerging Computing Technologies:** Optimal Semi-Balanced Trees for Processing-in-Memory.
- **October 2025, UC Berkeley. In Programming System Seminar:** Building HPC Systems for Near-Data-Processing: Theory and Practice.
- **October 2025, Stanford University. In Software Research Seminar:** Building Programming Systems for Near-Data-Processing: Theory and Practice.
- **October 2024, CMU. In Parallel Data Lab (PDL) Retreat:** Fast and Principled Techniques for Heterogeneous Compute and Memory.
- **November 2023, CMU. In Parallel Data Lab (PDL) Retreat:** System Design on Processing-In-Memory: Starting from Database Systems.
- **November 2022, CMU. In Parallel Data Lab (PDL) Retreat:** PIM-tree: A Theoretically and Practically Efficient Index for Processing-In-Memory.
